

Dive & Explore

Shark Teeth Treasures

Join **Florida West Scuba and Charters** to explore the treasures below the water. Search for the elusive 5-inch megalodon sharks tooth or some other fossilized tooth or bone from another time.

Spend **Two**-90 minute dives in 25 to 35 feet of water searching for the bounty. The water will be warm and visibility will be part of the adventure. The hunt is very entertaining and enjoyable. September 16, 2017 might be your lucky day to find a treasured fossil that's envied by all. There will be 12 divers on the 31-foot Island Hopper dive boat called "**Hammerhead**" and they will provide their World Famous Cookies and bottled water.

Search & Discover.
